

Are you generally interested in how valuable information can be obtained from data - in other words, in data science?

YES

When dealing with data, do you want to understand how companies use it to better understand customers, optimise processes or develop digital business models?

YES

Digital Business & Data Science

NO

Do you enjoy programming and would you like to learn how to develop intelligent systems such as voice assistants or image analyses?

YES

Are you interested in the technological core of AI - e.g. neural networks, algorithms and machine learning - and would you like to work on practical AI projects?

YES

NO

Artificial Intelligence & Data Science

NO

It looks like your interests don't (yet) fit 100% with our Data Science degree programmes. Please contact us to clarify this again.

Would you like to understand and develop the mathematical foundations of data science and machine learning, and do you enjoy working analytically on complex problems?

YES

NO

Mathematical Data Science
